Front-end/Frameworks v1.0: [sales-table](#), [crumb](#), [social-app](#)

A natural planner who loves seeing a thoughtful and well-laid strategy come together, as well as refining existing systems. As an organized problem-solver, I find equal parts reward in both the challenge and the solution, and I am dedicated to finding new and effective ways to apply my development skills to practical applications.

- **Front-end:** HTML, CSS, jQuery
- **Frameworks, etc:** .NET, ASP.NET MVC, Entity, Angular
- **Query Languages:** SQL(PostgreSQL, SQL Server), LINQ
- **Programming Languages:** C#, JavaScript

Professional Development Experience

2020-04 - Current

Web Developer

GT Rusty, LLC, Ann Arbor, Canton, MI (FKA Caliente Design)

GT Rusty is a boutique web development company with a strong focus on SEO. While the long-term clients are primarily locally-owned companies in the automotive industry, clients range anywhere from law firms to specialty retail start-ups. Our primary goal is to keep our clients' web presence current, efficient, practical, and accessible.

Languages/Frameworks/Tooling: CSS, HTML, JavaScript, FPDF, C#, Adobe CS, npm, Angular 10, .NET5, Entity, SQL, Magento 2, Shopify, Visual Studio/Code, Postman, Filezilla, Meld, Git.

Projects

Nice Car Company Website nicedcarcompany.com

For the Nice Car Company's website renovation, they wanted to focus on their new online car buying feature, as well as update to a fresher, more modern look. My role in the project included mockups for the home page images, designing and building the footer pages, building updated FPDF's, as well as contributing my perspective on various parts of the site's overall design aesthetic to the lead developer.

Ann Arbor Eagles Trivia Web App (solo project using .NET 5 API, Angular, EF Core, SignalR) [view docs](#)

In response to the pandemic, the Ann Arbor Eagles needed a way to run their live trivia without requiring guests to leave their tables. Players can register their team and submit answers to questions from their tables. The host can remotely trigger questions, score answers, and edit teams.

Previous Professional Experience

General Manager

Ashley's Restaurant, Ann Arbor, MI

Ashley's has been an Ann Arbor staple for decades, and Michigan's original craft beer multi-tap. As a small locally-owned restaurant, my responsibilities ranged through all areas of the restaurant, including day-to-day operations, training, sales-building, marketing, event-planning, menu design, and the creation of operational systems in a constantly evolving industry.

Education

Bachelor of Arts: Graphic Design

University of Michigan - Ann Arbor, MI
